

SCCPSS Notification for June 1, 2020

Good evening Parents,

This is a message from Savannah-Chatham County Public Schools to let you know that Summer Reading assignments and Enrichment Activities are now available on SCCPSS.com. These projects ensure students can engage in relevant, grade-appropriate learning opportunities while they are away from the classroom for the summer. Summer Reading assignments have been created for all students grades K-12. The document available on the district's website contains a packet for grades K-5 and another packet for grades 6-8. Each Summer Reading packet contains guidance on how much reading students should complete, directions for reading response activities, appropriate Lexile information by grade level, suggested reading lists, and links to digital reading resources.

In addition to Summer Reading, Summer Enrichment Calendars are included in the document one for grades K-5 and one for grades 6-12. These enrichment calendars provide one activity per day for the months of June and July. Each enrichment activity provides an opportunity for students to engage with ELA, Math, Science, Social Studies, Art, Music, or World Language Content. While the enrichment activities are not mandatory, they will provide students a meaningful, and enjoyable way to explore new learning opportunities! We thank you for your support of Savannah-Chatham County Public Schools and hope you have a great summer break.
